Ecole du Centre - Collège Pierre Poivre Newsletter Culturelle

Mot de la Direction

Chers parents, chers élèves, chers collègues,

C'est un mois de juin dense qui s'est ouvert avec les habituels rendez-vous pour nos élèves de 3è qui se confrontent depuis le 1er juin aux traditionnelles épreuves du Diplôme National du Brevet, leur premier examen grandeur n a t u r e . T r è s courageusement et avec

beaucoup de sérieux, ils se préparent aux oraux et aux écrits qui jalonneront leur tout dernier mois de scolarisation à l'Ecole du Centre.

Mais c'est bien l'ensemble des élèves de tous âges qui continue à s'investir pleinement dans leurs apprentissages et les projets durant cette dernière ligne droite. Une fois encore, je souligne l'engagement de chacun d'entre eux ainsi que de tous les parents à leurs côtés, veillant à les encourager, les soutenir et à assurer leur bien-être au quotidien.

Nous le savons à présent, nous allons devoir clore cette année scolaire 2020-2021 loin les uns des autres mais je ne doute pas que les résultats trimestriels et des examens reflèteront le travail soutenu et régulier dont les élèves ont fait preuve tout au long de ce trimestre particulier et donneront matière à vous satisfaire et à être fiers.

Avant cela, permettez-moi, pour l'avant-dernière édition de notre newsletter culturelle, de vous inviter à découvrir quelques illustrations du travail effectué par les élèves, de la petite section de maternelle jusqu'à la 3ème.

Je vous souhaite une belle promenade dans nos « jardins de la connaissance » que nous continuons à cultiver inlassablement.

Carine VAILLARD *Cheffe d'Établissement*

S'épanouir pour grandir. S'engager pour l'avenir.

Arts Plastiques au Collège

Les Mobiles - 5e

Un mobile est un ensemble d'éléments construits en matériaux légers et disposés de telle façon qu'ils prennent des dispositions variées sous l'influence du vent ou de tout autre moteur.

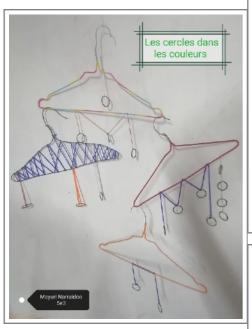

Après avoir lu la biographie et regardé les œuvres de l'artiste Alexander Calder - sculpteur et peintre américain connu comme l'inventeur de la sculpture mobile et de l'art cinétique - les 5e ont créé un mobile à leur façon, en faisant d'abord un dessin préparatoire, pour ensuite rechercher les matériaux possibles: du fil de fer, du fil d'acier galvanisé, du bambou ou du bois souple et fin, des chenilles, des tiges courbées, etc. Ils ont ensuite suivi les consignes suivantes:

- Les formes au bout du mobile peuvent être en carton plutôt épais pour la tenue (assiette en carton, boites de céréales), couvercles en plastique ou tout autres objets.

- Les pièces colorées seront percées d'un trou avec une perforeuse ou une pointe dure pour l'accrocher à votre mobile.
- Les tiges peuvent être reliées entre elle directement par une boucle, par un fil de nylon ou une cordelette.

A noter que la chose importante dans la construction d'un mobile est de toujours commencer par le bas en remontant vers le point de fixation du haut. On contrôle le balancement du mobile à chaque étape en le posant sur l'index.

Voici les travaux de Philicia, Mayuri et Chiara de la 5e3, et de Valentin de la 5e5.

La Perruque - 6e

Les 6e ont quant à eux étudié les oeuvres de l'artiste contemporaine Marie Claude Quignon, et se sont focalisés sur les perruques. Ci dessous les consignes ludiques et techniques pour la réalisation de ces oeuvres.

Consignes:

Vous allez créer une perruque extraordinaire en utilisant votre tête, ou celle d'un de vos proches comme support. Ça pourrait être une perruque pour rêver, voyager, danser etc. Vous essayerez de surprendre votre professeur d'arts plastiques par la hauteur de la perruque et son côté extravagant!

- -Vous prendrez comme base pour fabriquer votre perruque soit un bonnet, une casquette, un casque, un foulard, un serre tête etc.
- Vous utiliserez des objets que vous avez à la maison et que vous allez piquer, fixer, assembler sur votre base (perruque).

Exemples d'objets : plumes, pailles, feuilles et fleurs, cuillères et fourchettes en plastiques, pinces à linge etc.

-L'ensemble devra être stable et bien fixé.

Ici, les oeuvres de Maelle, Soan et Gabriella, en 6e1.

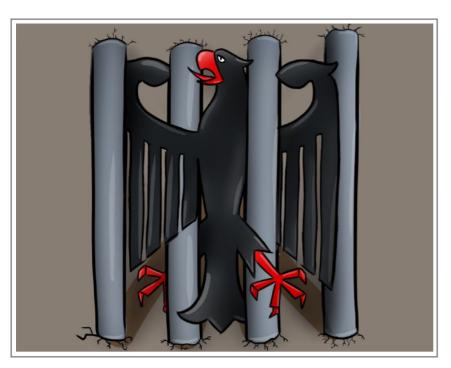

La Journée de la Terre

Le mardi 8 juin, nous avons célébré la Journée Mondiale des Océans. Avec le naufrage du Wakashio, nous avons été touchés de plein fouet dans ce qui est notre joyau le plus précieux : l'océan. Parce qu'il n'est pas trop tard pour sauver et protéger la faune et la flore marine, les jeunes, sensibles à leur environnement, font entendre leurs voix à travers ce projet piloté par le département RVM. Parmi les photo montages, nous retrouvons aussi un dessin de Siyin, et un clip de Léa: https://www.youtube.com/watch? v=bTidBxS8F74.

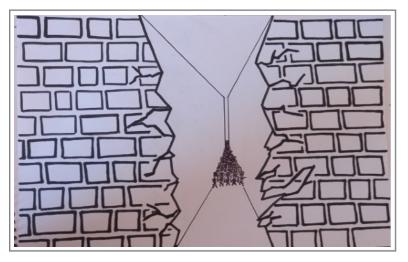

Les 3e (Allemand) à la East Side Gallery

Connaissez-vous la East Side Gallery à Berlin? C'est la partie du mur de Berlin la mieux conservée et l'une des plus grandes attractions touristiques. Elle est couverte d'environ 118 peintures réalisées par des artistes du monde entier. Ce trimestre, nos 3e se sont mis à la place de ces artistes et ont réalisé à leur tour une oeuvre sur le thème de la réunification.

« Für meine Graffiti an der Berliner Mauer, habe ich den deutschen Reichsadler gezeichnet. Der Adler ist hinter Gittern. Ich habe dieses Graffiti gemacht, weil ich das Eingesperrtsein auf dem deutschen Volk vertreten wollte. Während des Kaltes Krieges, war Deutschland in zwei Teilen geteilt und das Volk an der Ostseite war nicht frei. Für mich ist Freiheit sehr wichtig und deshalb hat diesen Teil der deutschen Geschichte mich inspiriert. »

Téa, 3e4

« Es ist eine Zeichnung einer zerbrochenen Wand.

Das ist die Berliner Mauer.

Von der anderen Seite, gibt es die Silhouette der Ostdeutschen .

Ich wollte zeigen, wie die Ostdeutschen kamen. »

Louanne, 3e4

« Ich war von der Zerstörung der Mauer und von der Wiedervereinigung von Familien, die durch die Mauer der Schande getrennt waren inspiriert.

Ich zeichnete ein Auge, das den Durchgang der Bewohner beobachtet. »

Thomas, 3e3

Recettes de boissons typiques de l'Allemagne - 5e

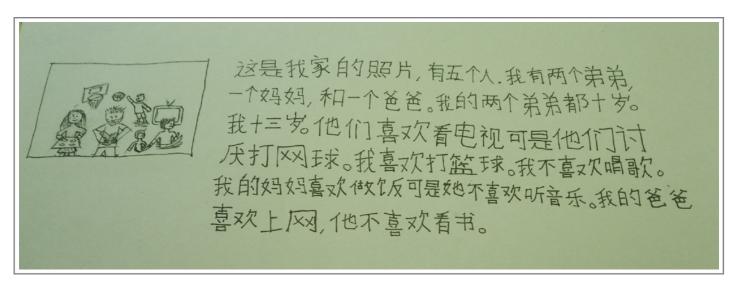

En 5ème, nous avons travaillé le thème de l'alimentation ce trimestre. Nous avons découvert certaines traditions germanophones, notamment celles des boissons : En Allemagne, on boit volontiers un mélange de jus de pommes et d'eau gazeuse appelé, Apfelschorle. Quant au Spezi, il s'agit d'un mélange de cola et de soda orange. Les élèves se sont lancés chez eux dans une dégustation de ces boissons. Essayez chez vous la recette!

 $\frac{1}{2}$ verre de jus de pomme + $\frac{1}{2}$ verre d'eau pétillante pour l'Apfelschorle.

2/3 de verre de coca et 1/3 de verre de fanta pour le Spezi.

La famille en Mandarin - 5e

Au cours de la séquence sur la famille, les 5e4 ont eu plusieurs tâches pour montrer leur connaissance sur le chapitre, dont l'une était "de trouver l'intrus". Cette tâche consistait essentiellement en un élève qui dessine ou cherche une photo d'une famille faisant différentes activités sur l'internet et à l'écrit décrivit l'image avec plus de détails que possible. Le but de l'exercice était de faire une erreur dans la description afin que ses camarades de classe puissent déterminer quelle personne est l'intrus.

Crime stories - 5e4

The 5e students studied and wrote crime stories in English; we are delighted to present four of them!

The Revenge, by Anna

One day, Mr McBusy was at a train station in London to take the train for Chester. When he got on the train, he hooked his cotton coat on a coat hook and entered in the smoking cart...

Another man entered and sat on the bench in front of him. Mr McBusy was a little bit scared of the man, because his attitude was very strange. The strange man, lit his cigarette and smile. So to not panic, Mr McBusy pretended to read his newspaper.

The smoke from the cigarette was poison! Because of that smoke, McBusy passed out! The smoker, meanwhile, stole Mcbusy's cotton coat!

The stranger was, in fact, Mr McBusy's cousin, his name was Jordan McBusy. Jordan had always been jealous of him that's why he came to take revenge...

Gordon Braiser, by Zoé

On the 30th of July 2021 the life of the residents of tamarin changed forever. It was like this lovely seaside village was drowning in a wave of fear. On this special day Gordon Draiser a 15 year old teen was found murdered on the side of the forest in the gorges of Black River. Gordon was a small town boy, surfer, green eyes, long and thin, blond and a very popular teen.

He went there for the last time of his life to take a little tour. In the last weeks before his death he broke off his daily routines. He started sneaking out without permission seeing a lot of people and strangest of all he had a new girlfriend.

The police officers first of all asked his girlfriend if she knew anything about Gordon Draiser's murder. She answered that she had nothing to do with it but she knew something about what he was going to do on that night. She said that they were searching for quick money to start a business of crystals, so the few weeks before he was sneaking out to deliver some drugs. She answered.

After the autopsy the body had revealed injuries on his left arm and his back. It seemed like someone attacked him in the back with a knife- but it isn't the only thing that they found, they also found out that he wasn't killed on the 30th but on the 29th. That means he was kidnapped than released dead on the side of the forest.

After 3 weeks of inspection they found four suspects:

His sister

His girlfriend

The guy he was dealing with

His parents

The police officers asked many questions to his girlfriend and they found out that she was innocent.

The guy he was dealing with was sounding very suspect so they kept him in prison.

His parents were completely innocent.

His sister was sounding very suspicious.

You must also know that the Draiser family was a very well-respected family in Mauritius.

After 3 months of investigations the police officers hadn't got any further. The Draiser parents took the investigation in hand and they found out that it was the guy he was dealing with. The thing is that the guy was sounding very suspicious that's true but he didn't seem as if he could kill Gordon. So some of the students of the high school of Gordo, found something very very suspicious.

They continued digging until they found something that changed their life forever. They saved the life of a pour guy who wasn't even implicated in the dealing of the drugs that Gordon Draiser did.

The murderer was someone who he trusted that lived with him every day of his life...

The murderer seemed to be innocent but she killed her own son in cold blood.

Later on they found out why his mother killed him. She killed her own son because he spotted her having a secret relationship with a rich guy, the guy who was dealing the drugs with Gordon.

Crime Short Story, by Laeticia

In a bustling city, the air was very cold. Luc was about to enter a train, followed by another man who looked not very clear. When they got on the train, the air was tense and Luc felt that something was wrong, he hung up his coat and went to sit reading his newspaper. Suddenly a smell of smoke invaded the room.

It was the guy in front of him who was smoking. He gave him a dark look and that's when Luc sensed something bad was going to happen. Luc thought that it was just a smoking man, but no. The man stood up, and hit Luc violently to the point that he passed out. The man grabbed the coat and ran to another cabin. Luc woke up about 30 minutes later and no longer saw the man in front of him. He thought he had just fallen asleep but when he turned his head, he couldn't see his coat.

They hadn't yet arrived at their destination, so where did this mysterious man have left? Luc tried to stand up but his head was spinning. This coat was really important to him because it was a gift his grandfather had given him before he died and it was very expensive. He was on his way to take it to his parents' house. Luc wanted to chase that guy, so he went in every cabin of the train, but no mysterious guy, he was already gone.

So Luc decided to give a statement to the police and 1 month later, they found him in the street, drug dealing for expensive things.

A lucky lady, by Anish

Alice was thrilled about her trip. She waited so long for this, but at the same time she couldn't shake this weird feeling of being watched. The chill air outside did nothing to calm her. She tried appearing composed, but inside she was in agony. When she sat down in the train, she clutched her bag tightly. The uneasiness inside of her grew when an odd-looking man came to sit near her.

She had a lot of money on her, but it was for something very important to her. She had worked so hard for this. This money was to buy her first dream home. The man who was beside her looked scary as if he was about to attack her. Suddenly he tried to take her bag forcibly. She fought, fought and fought. She didn't let go of her bag, she tried kicking him hard. Fortunately, a man who was nearby heard her screaming and came to her rescue. He successfully managed to knock out the thief. At the next station, the police enter the train and arrested the thief.

Filing a complaint takes time. Alice was stuck at the police station, giving her statement for at least five hours. She was so tired. She was supposed to meet the owner of the house on sale hours ago. However, she didn't lose hope and proceed on her journey. Arriving there, she was so happy to be able to finalize the deal. To her great surprise and disappointment, the owner already sold the house to someone else. He told her that he got a better offer, and as she was late, he thought that she was no longer interested. She was so shocked, she couldn't utter a single word.

She roamed around the streets for hours crying her heart out, when an elderly lady noticed her. "Young lady why are you crying". Alice didn't know her but she was so sad that she told her all of her misery. "Young lady I think you are in luck." Apparently, the elderly lady was selling her house as she was moving into a retirement home. After visiting the house, Alice realized that it was similar to her dream house. Alice was so happy again. It had a small garden exactly as she wanted. And, it was within her budget. She could also have a dog now. She used to live in an apartment where no pet was allowed. Despite everything she went through that day, she felt so lucky.

Articles about the protection of animals - 5e4

Students have researched the topic of protection and welfare of animals, be it domestic or wild, and have written articles about it. Some of the images which follow may be difficult to watch.

Morning Eyewitness

Why are so many lions disappearing in Africa? Across Africa, up to one-quarter of the world a wild form have vanished in little more than a decade. The mason for the decline of the king of beauty can be summed up in one word; people. As more Taxassians take up familing and sandting, they push farther into like country.

is it true that lions are killed for meat?

While the owners of a ranch joint they do not hard and hill their to groups say most breeders sail their stack to be shot should by would from Europe and North America, or for traditional medicine in Asia.

Is it legal to hunt lions in South Africa?

South Africa has a strong hearing <u>booking</u> but flow people repress result and earliest its elektronic contest form. It is still legal to taring a lion contest back to Helstein par argustine in Europe or North America) as a topple, and much of the demand contest electronic.

Why do people kill these amazing animals?

The Weekly Bugle

By: Keysan Peerbux (me)

Do people really care about animal welfare?

Table, thousands of adminst are shifted in injected as the world. Exceptly became by however in the α is direct a fight with other whools, from any opin do not can when it to become if or a delivent all results and other and or some in these and animal medical manifest and interest and except and interest and except and interest and except and interest and except animal fine most. For example, the first the property and the first the first three short and except animal vertices with matter than the α is a short of the most. The property and the first three with matter animal vertices with matter of eights.

This first article is to tell everybody (especially young people) to have good behaviour with their pets.

Did you knew that in the world 1.5 million pets are shandored cach year and that 670 000 are dept and

800 000 you need. That is 000 000

Trey MEED to have a suitable environment, like a pig will need mud and a bind a comfortable nest. They also MEED to have a good diet (do not give cut fixed to dogs because dog fixed is too expensive por

Your pets NEED to have a behaviour that is praper to them. Like my dags. We let them do whatever they

animals they can play with. Finally, they NEED protection, A human or an animal that protects them from the worlds danger.

MSAW: BAD TREAMENT OF DOGS The bad treatment of dogs at the

In this article you will find out ow the MSAW treat dog. Lake of space, dirty environment, not probably fed.

IS MSAW A GOOD ORGANISATION WHICH ENSURE THE PROCTECTION OF DOGS AND PREVENT CRUELTY TO DOGS?

Do I agree this

No, because animals should be treated like a human being with love and affection.

MY OPINION I think that everyone should be aware of the situation; how dogs are being treated so that urgent actions are taken to stop this cruelty against animals.

VOGUE Animals

Animals who will be Angels! -by Jemimah <3

Why is animal testing cruel.

Are you buying products whose mark does animal testing?

In my article you will learn some sad news about animal testing which is a hotly debated topic in our society who will maybe sensitize you to make a move for those animals and how to make this move.

Animal testing is when Scientifics test products (such as food, cosmetics, chemicals, drugs, covid-19 vaccine etc....) on animals (rabbits, rats, cats, dogs, guinea pigs, snakes, monkeys etc....) so that after humans can use it without any diseases, altergies/reactions or after-effects. Here's how they proceed: Scientifics put animals into cells or hold them with their hands or with other equipments (which causes Scientifics pull animas into cells or hold them with their hands or with other equipment's (which causes them anixely; them the product is either inhaled by them' forced to be eaten by them, rubbed on their skin/fur or injected, if you think that is painful well it is but it's only minimal or it's a small discomfort but most of the animals suffer a lot. Unfortunately they barely survive to this cruelty (only 3% of animals survive to animal testing). Then those poor and innocent beasts are sent in the monitoring department of the Lab to see if they have any reaction allergies or after-effects. You probably wonder why they do the testing on see in they have all year adult all segrees if they do it on human beings it can cause harm rather than good but it does for the animals. It's adult) excause if they do it on human beings it can cause harm rather than good but it does for the animals too. I am obviously AGANST this treatment because animals play great roles maintaining the blodiversity and the ecosystems and without them there will be a big age on earth that no one could replace but each year more than 100 million animals die in NY. So my solution would be to try and stop buying products from marks who does animal testing as much as possible and supportibuty marks who are cruelly-free or if you know some friends and family who buy animal tested products inform them and sensitize them.

Everything about animal abuse should stop, they can't speak for themselves we are their voices https://youtu.be/G393z8s8nFY

Makeup Brands That Test On Animals

Les Robots des CE2

Pour travailler sur la reconnaissance des solides en géométrie, les élèves de CE2 ont eu pour défi de construire un robot avec du matériel de récupération. Certains ont aussi travaillé sur des productions d'écrits, créant un mode d'emploi pour expliquer les différentes étapes de fabrication. Appuyez ici pour voir tous les différents robots ingénieux :

https://youtu.be/DCS89gUY0m8

Les CE1 présentent le désert et créent...des problèmes

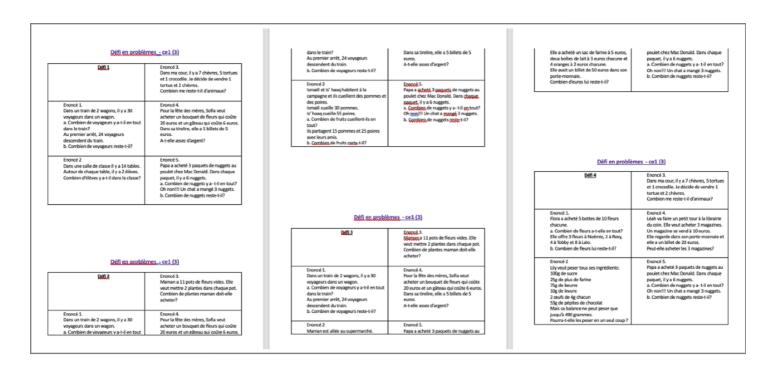

Les CE1 ont cherché des informations sur les animaux du désert et ont réalisé une affiche pour présenter leurs trouvailles. Ils ont travaillé en distanciel par groupe de deux.

Ensuite, dans le cadre d'une autre activité, ils ont écrit des énoncés de problèmes et les ont partagés à la classe sous la forme d'un défi en problèmes. Ils ont finalement partagé avec les autres classes de CE1. Les élèves ont reçu un petit diplôme pour leur participation au défi.

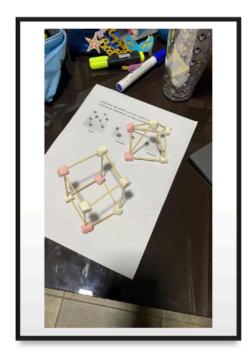

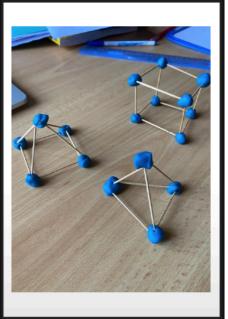

Les CPs présentent 4 activités

Les Solides

Les CP1 ont travaillé sur les solides : cube, pavé, pyramide, cylindre, cône et boule/sphère. Les élèves ont fabriqué des solides à partir d'un modèle avec des bâtons et de la pâte à modeler. Ils ont également cherché des solides chez eux et les ont rangés par famille.

Les arbres généalogiques

Également en CP1, les élèves ont exploré leurs liens de famille en arts visuels, et ont ensuite réalisé leur arbre généalogique.

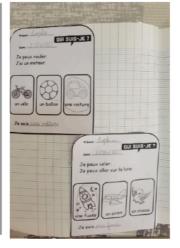

Devinettes et anagrammes

En CP2, on aime apprendre en jouant avec les lettres et les mots. D'abord des devinettes inférences : l'élève doit rechercher les indices qui lui permettent de déduire la réponse au travers de sa lecture. On joue aussi avec les anagrammes qui sont des mots obtenus en mélangeant les lettres pour obtenir un nouveau mot. On vous propose de jouer avec les 2 anagrammes joints ...

Que des mots doux...

La 'confiture de mots doux' a été fabriqué par les élèves à l'occasion de la fête des mères mais elle était destinée aux papas également. Fière des CP2 pour avoir fait leur maximum pour préparer cette attention en autonomie et en cachette! A l'intérieur de cette 'confiture'; des mots doux ou des bons pour des massages ou autres et un poème à réciter.

La Maternelle in English

The Moyenne Section has worked on different types of jobs, and discovered those related to airplanes, especially pilots. The students had fun with family, in various crafts and activities. The Grande Section has been working on fairytales, and one particular week was Goldilocks and the 3 bears. The students enjoyed acting out the story!

La Petite Section pétille

Les albums

Depuis la rentrée de mai, la classe de Petite Section 1 a eu l'occasion de découvrir des albums différents et de faire des activités ou de relever des défis rigolos en lien avec ces histoires. Par exemple lorsqu'ils ont travaillé sur l'histoire "La maison de l'escargot", ils se sont déguisés en escargots ou alors en sorcières et sorciers, après avoir découvert l'album "Le bouton de la sorcière"; même la maîtresse s'est prise au jeu!

« Toujours rien! » Christian Voltz

Les PSM 1 ont également travaillé sur l'histoire de Christian Voltz: "Toujours Rien!" et ils ont essayé de représenter un visage en utilisant divers objets qu'ils ont pu trouver chez eux, à la manière de l'auteur et illustrateur. La maîtresse a envoyé les créations des élèves à nulle autre que Christian Voltz lui-même et devinez quoi? ... Il leur a répondu!

Bonjour les enfants et la maîtresse,

.... et je tiens à vous dire un grand

MERCI!!!

car ça me fait vraiment plaisir!

Alors, de la part d'un spécialiste du fil de fer et des p'tits boulons, je vous envoie toutes mes

félicitations!!!

Vous avez drôlement bien travaillé!

Vous avez parfaitement compris comment faire alors, continuez à récolter des p'tits objets, à prendre du plaisir en fabriquant des personnages rigolos et en leurs inventant de chouettes histoires!

Je vous souhaite, à vous les enfants et à la maitresse, une belle fin d'année!

Christian Voltz www.christianvoltz.com
